

# Package ‘rosetteApi’

October 5, 2016

**Type** Package

**Title** Rosette API

**Version** 1.4.0

**Date** 2016-10-05

**Author** Sam Hausmann [aut, cre],  
Chris Park [ctb],  
Hannah Gaudet [ctb]

**Maintainer** Chris Park <cpark@basistech.com>

**Description** Rosette is an API for multilingual text analysis and information extraction. More information can be found at <<https://developer.rosette.com>>.

**License** file LICENSE

**Depends** R (>= 3.1.0),  
httr,  
rjson

**Suggests** knitr,  
rmarkdown,  
testthat

**URL** <https://developer.rosette.com>

**BugReports** <https://developer.rosette.com/support-ticket>

**RoxygenNote** 5.0.1

**VignetteBuilder** knitr

## R topics documented:

api . . . . .	2
check_content_parameters . . . . .	3
check_for_multipart . . . . .	3
check_morphology . . . . .	4
check_names . . . . .	4
create_multipart . . . . .	5
error_check . . . . .	5

get_endpoint . . . . .	6
mutipart_call . . . . .	6
post_endpoint . . . . .	7
serialize_name_parameters . . . . .	7
serialize_parameters . . . . .	8
to_json . . . . .	8
<b>Index</b>	<b>9</b>

---

api	<i>api wrapper function that checks for a user_key and determines the Rosette API endpoint to be utilized</i>
-----	---

---

**Description**

api wrapper function that checks for a user\_key and determines the Rosette API endpoint to be utilized

**Usage**

```
api(user_key, endpoint, parameters = FALSE, customHeaders = NULL,
    url = "https://api.rosette.com/rest/v1/")
```

**Arguments**

- user\_key - Rosette API authentication key
- endpoint - Rosette API endpoint to be utilized
- parameters - parameters list to be passed to specified Rosette API endpoint
- customHeaders - custom headers for Rosette Api
- url - url for Rosette Api

**Value**

Returns json of the specified Rosette API endpoint response

**Examples**

```
## Not run:
key <- "content"
value <- "Bill Murray will appear in new Ghostbusters film."
parameters <- list()
parameters[[ key ]] <- value
parameters <- toJSON(parameters)
api(01234567890, "entities", parameters)

## End(Not run)
```

---

`check_content_parameters`*preemptive check for content/contentUri request parameter errors*

---

**Description**

preemptive check for content/contentUri request parameter errors

**Usage**

`check_content_parameters(parameters)`

**Arguments**

`parameters` - parameters list to be passed to specified Rosette API endpoint

**Value**

Returns list of verified parameters to be sent to Rosette API

---

`check_for_multipart` *check if the request parameters contain multipart*

---

**Description**

check if the request parameters contain multipart

**Usage**

`check_for_multipart(user_key, parameters, endpoint, customHeaders, url)`

**Arguments**

`user_key` - Rosette API authentication key  
`parameters` - parameters list to be passed to specified Rosette API endpoint  
`endpoint` - Rosette API endpoint to be utilized  
`customHeaders` - custom headers for Rosette Api  
`url` - url for Rosette Api

**Value**

Returns json of the specified Rosette API endpoint response from either a multipart or non-multipart request

---

check_morphology	<i>determine which morphology endpoint to use</i>
------------------	---

---

**Description**

determine which morphology endpoint to use

**Usage**

check\_morphology(parameters, endpoint)

**Arguments**

parameters	- parameters list to be passed to specified Rosette API endpoint
endpoint	- Rosette API endpoint to be utilized

**Value**

Returns the specified morphology function

---

check_names	<i>check if the required request parameters for either names endpoint are correct</i>
-------------	---

---

**Description**

check if the required request parameters for either names endpoint are correct

**Usage**

check\_names(parameters, endpoint)

**Arguments**

parameters	- parameters list to be passed to specified Rosette API endpoint
endpoint	- Rosette API endpoint to be utilized

**Value**

Returns list of verified parameters to be sent to Rosette API

---

create_multipart	<i>create a multipart</i>
------------------	---------------------------

---

**Description**

create a multipart

**Usage**

create\_multipart(parameters)

**Arguments**

parameters      - parameters list to be passed to specified Rosette API endpoint

**Value**

Returns a multipart

---

error_check	<i>check if Rosette API response includes and error message</i>
-------------	---

---

**Description**

check if Rosette API response includes and error message

**Usage**

error\_check(response)

**Arguments**

response          - response from Rosette API

**Value**

Returns an error if one exists or the Rosette API response

---

get_endpoint	<i>GET request to specified Rosette API endpoint</i>
--------------	--

---

**Description**

GET request to specified Rosette API endpoint

**Usage**

```
get_endpoint(user_key, endpoint, customHeaders, url)
```

**Arguments**

user_key	- Rosette API authentication key
endpoint	- Rosette API endpoint to be utilized
customHeaders	- custom headers for Rosette Api
url	- url for Rosette Api

**Value**

Returns the response from the Rosette API

---

mutipart_call	<i>make a multipart POST request</i>
---------------	--------------------------------------

---

**Description**

make a multipart POST request

**Usage**

```
mutipart_call(user_key, parameters, endpoint, customHeaders, url)
```

**Arguments**

user_key	- Rosette API authentication key
parameters	- parameters list to be passed to specified Rosette API endpoint
endpoint	- Rosette API endpoint to be utilized
customHeaders	- custom headers for Rosette Api
url	- url for Rosette Api

**Value**

Returns the response from the Rosette API

---

post_endpoint	<i>POST request to specified Rosette API endpoint</i>
---------------	---

---

**Description**

POST request to specified Rosette API endpoint

**Usage**

```
post_endpoint(user_key, parameters, endpoint, customHeaders, url)
```

**Arguments**

user_key	- Rosette API authentication key
parameters	- parameters list to be passed to specified Rosette API endpoint
endpoint	- Rosette API endpoint to be utilized
customHeaders	- custom headers for Rosette Api
url	- url for Rosette Api

**Value**

Returns the response from the Rosette API

---

serialize_name_parameters	<i>serialize Rosette API parameters</i>
---------------------------	---

---

**Description**

serialize Rosette API parameters

**Usage**

```
serialize_name_parameters(parameters)
```

**Arguments**

parameters	- parameters list to be passed to either name-translation or name-similarity
------------	--

**Value**

Returns the serialized parameters for the Rosette API

---

serialize_parameters	<i>serialize Rosette API parameters</i>
----------------------	---

---

**Description**

serialize Rosette API parameters

**Usage**

```
serialize_parameters(parameters)
```

**Arguments**

parameters      - parameters list to be passed to specified Rosette API endpoint

**Value**

Returns the serialized parameters for the Rosette API

---

to_json	<i>convert Rosette API response content and headers to json</i>
---------	---

---

**Description**

convert Rosette API response content and headers to json

**Usage**

```
to_json(response)
```

**Arguments**

response          - response from Rosette API

**Value**

Returns a vector containing json of Rosette API response and response headers
